### vandal resistant kits

## VRK-4S 4 STATION VANDAL RESISTANT SURFACE MOUNTING KIT

### VRK6S + TRVRK 6 STATION AND TRADESMAN VANDAL RESISTANT FLUSH MOUNTING KIT

**EXAMPLE SYSTEM** 

### **ORDERING INFORMATION:**

Order a model VRK1 for a complete single station system. For multi-way systems order a model VRK'N' where' N 'is the number of stations, e.g. a model VRK14 is a complete 14 station system.

'S' after the reference number indicates surface unit. For tradesmen entry facility, simply add TRVRK to any given system, e.g. a six station system as shown above with trades facility is a VRK6 + TRVRK (a Time clock is Included). Engraving and panel layout is confirmed with the customer via an

order confirmation sheet.

Delivery is normally 7 days from confirmation of order
For more details please contact our sales office.

A VRK System Comprises...

- \* Model 801 telephones for each station.
- \* Model VRP'N' stainless steel front door panel
- \* Model 61 speech unit.
- \* Model 203 surface lock release.
- \* 12 V AC fused power supply.
- \* Back box (flush or surface where appropriate)
- \* Full wiring and installation instructions

### **CUSTOM MADE VANDAL RESISTANT DOOR ENTRY**

Available in either Flush mounting or Surface mounting (surface mounting only available up to 25 buttons).

For those areas that may be prone to external vandalism we offer the VRK Series door entry systems. These systems are of similar robust specifications to the 900 series but include a model VRP front door panel instead of the standard SPA range. The model 801 telephones are included as standard for systems up to 20 and we include model 801P privacy telephones on systems with more than 20 stations.

The model 801 wall-mounted telephone is manufactured from high-impact white ABS plastic. It incorporates an AC Buzzer and a push-button for operation of the lock release. The handset cord is coiled with a sleeve at the point of entry to the handset for durability and has a plug-in connector to the telephone base. The 801 telephone with its wide handset is especially recommended for the elderly and for areas with high usage.

The model VRK panel is manufactured from 12 SWG polished stainless steel. All panels are fixed to the back-box by tamper-proof bolts (a special key is required to remove the panel).

A vandal resistant button is provided for each flat with the option of one for tradesmen/service. Each panel is custom engraved to the client's specifications. The engraving of flat numbers is included in the price of each system. However, further engraving (e.g. Block names) can be included at an extra cost

Panels are made to standard back-box sizes; custom sizes can be accommodated at an extra cost.

ALL VANDAL RESISTANT PANELS ARE SUPPLIED WITH STAINLESS STEEL AS STANDARD. BRASS, ALUMINIUM, CAN BE SUPPLIED IF REQUIRED

### **CABLE REQUIREMENTS (ALL SYSTEMS):**

4 core plus 1 additional core per number of handsets in the system. This must be twisted pair cable, type CW1308. 2 Core bell wire (E450) is required from transformer to door station and 2 core 2192Y (E470) for each door lock.

# Door Entry combined coded access

### **BELL CS COMBINED CODED ACCESS AND DOOR ENTRY SYSTEM**

Combined 1, 2 and 4 way coded access and door entry system. This allows residents or legitimate personnel the means of entry to the building by the operation of an integral keypad

at the main entrance panel. The kit comprises aluminium surface mount door panel with keypad module, handsets with door release button, speech unit, power supply, surface lock release and full instruction and programming instructions.

### P612KP BELL SLIMLINE STAINLESS STEEL KEYPAD

This keypad is recommended for most environments. Due to its slim dimensions it is ideal for discrete fixing where space is at a premium. It utilises a 2 x 6 matrix instead of the conventional 3 x 4, which allows for a slimmer keypad. Features keypad and buttons in high-grade stainless steel, aluminium surface mount back box, a green and red LED are included for visual indication of operational status, keypad is connected directly to the controller with 10 wires (or 7 if the LEDs are not utilised). Boxed.

## coded entry

## P612CK BELL SINGLE DOOR CODED ENTRY KEYPAD SYSTEM

The P612CK allows for controlled access through one door via an independent keypad and lock release. A complete control system for a single door comprises of the following 1 x stainless steel surface keypad, 1 x boxed controller, separate power supply (1 door) and 1 x standard rim lock release. Features include 10 access code, timed outputs for both fail secure and fail safe release mechanisms, and non volatile EPROM memory. Boxed.

## handsets & accessories

### P665M

### **BELL 801 STANDARD DOOR ENTRY HANDSET**

Standard door entry handset found in most Bell door entry kits. Boxed. Handset only.

ColourWhit	e
Dimensions (mm)	1
Weight (kg)	7

#### P665S

### **BELL 801 HANDSET WITH MUTE FUNCTION**

A replacement 801 handset for Bell Door Entry systems, featuring a mute button.

Boxed. Handset only.

ColourWhite
Dimensions (mm)
Weight (kg)

### P665PS

### **BELL HANDSET WITH PRIVACY & MUTE FUNCTIONS**

Bell deluxe handset for use with most bell products. The unit features heavy duty ABS plastic design and lock release button positioned under the handset to prevent accidental operation, mute switch and privacy function. Boxed.

Colour	hite
Dimensions (mm)	x81

## P667A BELL BLP1 BELLINI ONE WAY REPLACEMENT PANEL

Replacement door entry panel designed as part of the Bellini range that can also be used with the standard 900 series Bell door entry systems. The panels are surface mounted and manufactured from anodised aluminium with complementary black plastic trim and chromed push buttons. The front panels are hinged for easy access and the hinges can be used on either side to aid installation in tight locations.

Colour	Anodised Aluminium
Dimensions (mm)	187x100x38
Weight (kg)	0.19

### P600T BELL M88 ACR1 RELAY

Relay unit to enable the use of sounders, bells and the P663D lock release with the M900 range. Boxed.

Colour	White
Dimensions (mm)	x106x40

bell

## P627RT BELL RT27 EXTENSION TONE FOR AC/DC HANDSET

These units extend the call tone of a door entry telephone to other areas of the premises to improve audibility. The unit is fabricated in white ABS plastic and can be wall mounted in a convenient indoor location. Model RT27 is for extensions to the standard 801 telephones.

**bell** system

### P633FB BELL FB31 FLASHING BEACON WITH TIMER

This unit works with most Bell door entry products and gives visual indication of a call at the door entry telephone. The unit is ideal for the hard of hearing or for areas of high background noise. The beacon includes a timer circuit that can be set between 4 and 20 seconds.

Colour	White
Dimensions (mm)	60x113x80

### P633T BELL 7 DAY AC/DC TIME CLOCK

Bell multi-program time clock enabling the timed activation of tradesman's buttons, etc.

# Door Entry switching units, lock release

### P663BC

### BELL 719S MULTI-DOOR SWITCHING UNIT

This unit allows the operation of a door entry system from two entrances. Several units may be combined to extend operation up to a maximum of eight entrances. When a telephone is called from a given entrance, the switching unit connects the telephone to the speech unit of that panel only for a fixed period (adjustable 25-230 seconds). During this time pressing the lock release button on the telephone will operate the lock of the calling door only. Boxed.

ColourBlack
Dimensions (mm)43x240x190
Weight (kg)

### **BELL 12 V ELECTRIC LOCK RELEASE**

Two mounting plates supplied, one designed to match surface mounted night latch locks (e.g. Union 1028) on inward opening doors, and one suitable for morticed night latch locks (e.g. Union 2332) on inward opening doors. It incorporates a 30 Ohm coil giving release operation from a 12 V AC or DC supply. Available in either Fail Safe or Fail Secure models.

Colour.....Aluminium

Ref No.	Туре
P662F	Fail Secure
P663D	Fail Safe

## P663V BELL LS47 WALL MOUNTING LOUDSPEAKER APARTMENT STATION

A wall-mounting, loudspeaker apartment station for use with the P663A Speech Unit. It features two large, pressable pads; one which is pressed to allow two-way speech with visitors and one to operate the lock release. Such ease of use makes it particularly suitable or those who find it difficult to hold a telephone handset. The unit uses standard 5 wire connection and requires a local 12 V DC power supply when used as a replacement for standard handset P665M or when connected to any AC door entry system.

ColourBlack	
Dimensions (mm)34x200x95	
Weight (kg)	

### P663W BELL LSD47 DESKTOP APARTMENT STATION

As Apartment Station P663V, but features anti-slip feet and is for desktop use only. It comes supplied with 1.95 m cable terminated with an 8P modular plug and surface-mount junction box.

Colour.																Black

## P663EX BELL 5077 EXIT BUTTON FOR 901

A white door release/exit button for the 901 Bell Door Entry System.

### P663U BELL ALUMINIUM INV203 INVERTER CASE

An inverter case designed for converting lock release P662F or similar, to work with a surface night-latch lock on an outward opening door.

Colour	Aluminium
Dimensions (mm)	34x136x51

## power supplies & speech modules

### P632Y BELL M225 12 V AC WALL MOUNT POWER SUPPLY

This power supply is a wall mounting double insulated fused transformer for use with door entry telephone systems. It has nominal output of 12 Volt AC @ 2 Amps and incorporates a relay for direct operation of the lock release. Unit is also used for multihandset systems.

Colour Grey	
Dimensions (mm)110x235x80	

### BELL M340 12 V DC WALL MOUNT POWER SUPPLY

A wall mount, fused 12 VDC regulated power supply rated at 1 Amp peak for use on DC door entry systems and access control systems. It can also be used for directly powering fail safe and continuously rated lock releases.

Colour	Black
Dimensions (mm)	80x235x105
Weight (kg)	2
Power Input	230 V AC @ 50 Hz

### P632T BELL M300T 12 V AC REPLACEMENT TRANSFORMER

Replacement 12 Volt AC transformer for use with standard and vandal resistant door entry systems.

ColourWhite
Dimensions (mm)45x78x55
Weight (kg)
Power Input230 V AC @ 50 Hz
Outputs

### **BELL M61 SPEECH MODULE**

Provides full duplex speech and is extremely compact due to the use of an electret microphone. This reduced size allows for smaller front door panels (up to 10 push buttons). The totally encapsulated unit is weather resistant. For use with the current range of bell products.

ColourBlack
Dimensions (mm)23x97x59
Weight (kg)

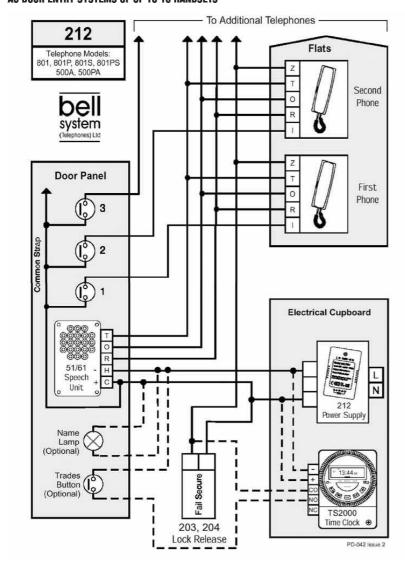

### P663A BELL M51 THK REPLACEMENT SPEECH MODULE

Replacement speech model for use with all M51 (THK) older models (square buttons and separate name) door entry systems to provide full duplex speech between the front door panel and the telephone. Totally encapsulated unit houses weather resistant plastic cone loud speakers and amplifier circuits.

ColourBlack
Dimensions (mm)31x138x81
Weight (kg)
